*At the Agriculture Barn in Mayerthorpe, Alberta*

## Welcome to our 14th Annual Sale

Welcome to our 14th Annual Sale! As always, we wish to thank all of our repeat customers for their strong support for our cattle and we certainly appreciate you all! This year we have some new Fullblood genetics in JNR Cool

Cat and Double Bar D Aero, both liver red bulls from very productive lines. We also have several bulls from our fantastic Barcelona bull. This is our 7th year using Barcelona, who is co-owned with Wolfe Farms, and is one of the most consistent bulls we have had, with super calving ease and great production. Our own Arnold bull is a thick power bull that has given us the type of bulls and heifers we strive to produce. On our Purebred side we have a great mix of low birthweight bulls from our KWA Mountain bull and Swantewitt Brave and really productive bulls from our super thick NAC Trustin bull. We have red power calves from Swantewitt Cayenne and easy calving, thick calves from CMS Skyline. We are sure to have a bull that will fit your program and all are semen tested and guaranteed. The 2 year old bulls are kept specifically for our sales based on birthdate.

Our replacement heifer calves are some top heifers that represent our herd. All of the calves at the sale have been halter broke through a 5 day program, vaccinated with Presponse HM, Express 5, Vision 8 with Somnugen and dewormed with Ivomec. We select our sale calves from our herd of 350 registered cows focusing on soundness, temperament, good udders and longevity. Halter breaking helps to ensure the calves are willing to be handled and we definitely feel it is worth the effort for our customers. Please call or check us out online, or stop by any time for a visit and coffee! We are located on the west side of Shiningbank Lake, between Edson and Whitecourt Alberta. .

Aero was Tony Wolfe's pick of the bulls at Dimmler's 2016 Bull Sale, and we borrowed him to use on a small group of cows last year. He has excellent walking feet, a long spine, depth of rib and the overall "herdbull" look. His sons are showing this same consistent development. These are some different genetics that we won't be offering for sale again in the future!

This compact bull was a calf we were highly considering keeping back to use in our own herd. He has a lower birthweight, and some newer genetics out of Tony Wolfe's Aero bull. There is some additional calving ease in the pedigree going back to our heifer bull Lakota. The cow side is a group of nicely muscled, moderate framed females who are structurally sound with easy going temperaments.

Here's a bull who goes back to a very strong maternal line. The cow family produces great milking females with very moderate temperaments and strong walking feet. This is the third bull calf from this cow already and she's only 5! We love having her in our herd and look forward to seeing what she produces us each year.

Barcelona was one of the high selling sons out of Virginia Ranch Champs Romano that sold in 2011, the natural calf out of their flush cow Barbie 46X and we share him with Wolfe Farms. We have used him successfully for 7 years on both mature cows and heifers and are highly impressed with his calving ease, low birth weights and consistency in color and production. He has large testicles, great color and a superb disposition, something we select for in our cattle. This bull's twin brother sold in our sale last year. He wasn't held back for any particular reason, we just figured we would sell one last year and save one for a 2 year old this year. Coming from the Barcelona bull don't be worried about the low birthweight and blame it on the twin. Barcelona is proven to be an easy calving sire and Dancer's dark red color makes him the whole package. He comes from a great maternal line going back to our old Bettina cow. Diego was kept back last year as a potential back-up in our cow herd. We never needed to use him but the girls halter broke him as a calf to potentially show in summer fairs and we have been very happy with how he has turned out. The dam's side is full of thick, soggy cows with loads of muscling and the sire side adds in longevity as Native Son produced for years with Danny Skeels and then we purchased him at the ripe old age of 10 and received another set of calves from him. 271S is still in our herd and calving in January again!

We chose to use him on a lot more animals last year and have been very happy with the results. Whenever a cow was calving bred to Brave we pretty much just sat back and waited for her to have it problem free. He was put on heifers again this year. What we have found with the Brave bull is that the animals all tend to have very manageable dispositions, solid coloring and thickness.

This guy has the potential for a heifer bull. The 501U cow is a big strapping cow who usually weans off a calf well into the high 800s each year and spits a calf out in under 30 minutes. She's quite impressive that way and we are hoping this young female follows in her mother's footsteps. Ted only calves about 25-30 cows each year so any cow kept in his herd gets very strongly critiqued and must be near flawless. We have found that the few cows he does own are exceptionally good quality and highly productive.

We just hand bred him to a few cows in 2016 and we were so impressed with the calves that he went out with 45 to breed on his own last spring. You can pick a Cayenne calf out of a field due to the impressive growth, size and muscling in both the bull and heifer calves. The 2 heifer calves produced both weaned off in the top 10% and we have already decided to keep one of his son's as a potential herd bull for next year who weaned off at 970lbs! It's not often that you see this much muscling in a red factor bull and he comes out of a female with perfect feet and a great udder.

The other Cayenne calf on offering, this bull is from one of our foundation cow families. The Waylore cow was one of the first cow's we ever purchased back in 1992 and so much of our herd goes back to her. She was a cow with awesome maternal genetics and this bull has the potential to go into a herd and make cows! This line has great feet and lots of milk as well as longevity and fertility.

Donelle's favourite herd bull on the farm! This is our 3rd year using Trustin and we are really pleased with this bull. He is outcross genetics from Northern Lights Simmentals in Manitoba and he comes from one of their oldest and best cows. Trustin is a dark red, solid, thick bull with excellent structure and walks out extremely well, all traits he passes on to his offspring. He is one of the most aggressive breeders we have seen, covering 40 cows as a yearling bull with ease, and continues to shine as an excellent breeder.

This bull is out of Darian's 'super cow'. This cow is just a smaller female with nice feet and a great udder but man she can wean off a calf! They come off pasture almost the same size as she is. Very efficient and one of those females who just puts it all into the calf. She comes out of a very strong, maternal cow line and she is 5 generations of our breeding.

All bulls offered for sale are warranted to be sound; however, the seller is not responsible for damage caused by foreign objects after the bull has been sold, nor sickness that was not apparent at the time of sale. In the event of a dispute, the sellers are responsible only to the extent of the purchase price of the said

animal. We assume no liability, legal or otherwise, to make any further compensation to the buyers.

**BREEDERS GUARANTEE:** We the sellers have done everything possible to assure you, the buyer, that every bull in this sale will be a breeder. However, should a problem arise, please inform the seller so the problem can be solved. The purchaser shall have six months from the date the bull reaches fourteen months of age to report in writing to the seller that the bull is a non-breeder, providing of course, that the bull has been maintained in satisfactory breeding condition.

Each consignor will have six months to prove the bill a breeder after the time of report. In the event a bull is a non-breeder the situation will be handled either by a replacement, credit, or money back. In no case will an adjustment be made for more than the purchase price of that particular bull. No guarantee is given that semen collected from any bull in this sale will freeze or be suitable for artificial insemination. Any breeding guarantee is strictly between buyer and seller.

**ACCIDENTS:** Although every precaution will be taken to protect the safety and comfort of our buyers, neither sales management, auctioneer, or consignors assume any responsibility in this matter and disclaims any

liability, legal, or otherwise, in the event of accident or loss of property.

### **DELIVERY OPTIONS:**

**Option A:** \$50.00 off per lot if picked up on sale day.

**Option B:** Bulls will be delivered free of charge within 200km of Mayerthorpe, as soon as possible after the sale, at the sellers convenience – over 200km will be arranged at cost.

**Option C:** Bulls will be kept at the sellers farm at no charge until April 1. A charge of \$3.00 per day will apply after that. Heifers should be taken/delivered on or soon after sale day. It is recommended that the 2 year old bulls are taken/delivered in a timely manner, due to the difficulty in managing these mature bulls after they return to the farm.

**RIGHTS AND OBLIGATIONS:** The above terms and conditions of the sale shall constitute a contract between the buyer and seller and be equally binding to both. Resale of livestock following purchase in this sale shall constitute a separate transaction and the rights and obligations of the two parties connected there to are not covered by the terms and conditions of this sale.
