

A group of Simmental cattle of various colors (brown, black, white, and red) are standing in a grassy field. In the background, there are trees with yellow and orange autumn leaves, and a blue sky. The text 'Swantewitt & Sage Simmentals' is overlaid on the top right of the image.

Swantewitt & Sage *Simmentals*

**21st ANNUAL
BULL & HEIFER SALE**

WEDNESDAY MARCH 5, 2025

LUNCH AT 12PM

SALE TO FOLLOW AT 1PM

AT THE FARM, SHININGBANK LAKE, AB

www.swantewittsimmentals.ca

Welcome to the 21st Annual Swantewitt & Sage Simmentals Bull and Heifer Sale!

Join us for this annual event held on the farm near the beautiful area of Shiningbank Lake. Come early for a pre-sale lunch and bull viewing.

We are currently experiencing some of the highest commercial prices in history. Now is the perfect time to consider replacing any bull over 4 years old, as cull bulls have never been this valuable. This is an amazing opportunity for commercial producers to add young bulls to their programs.

The Bremmekamp's and Lairds consistently bring their bulls along at a modest level, ensuring longevity and structural soundness. This honest, hairy set of bulls will thrive in any environment.

This year's offering is larger due to a shift away from 2-year-old bulls, resulting in a greater selection of yearlings. This is your last chance to purchase 2-year-old bulls from this sale, and the quality is impressive! There's a homo-polled fleck bull that will garner significant interest. Whether you need a fleck or a red bull, be sure to check these guys out.

When I viewed the bulls in late January, I was very impressed by the uniformity, good footed, heavy musculature, and hairy coats. Whether you need a fleck, red, or black bull, there's sure to be one that fits your program. If you're looking for a calving ease bull, there are many intriguing options to choose from.

Additionally, there's a great group of heifers available this year, with 30+ heifers offering a variety of reds and flecks. This is an exciting opportunity to grow your cowherd!

If you're unable to attend, please reach out to any of the Transcon Team. We would be happy to assist you. Hope to see you on sale day!

Regards,

Glenn Norton
Transcon Livestock Corp.

Auctioneer: Robert Lind

Ringmen: Darren Paget and Don Oberg

Sales Day Phones:

Jay Good 403-556-5563
Glenn Norton 780-542-0634
Darren Paget 403-323-3985
Cody Coupland 403-877-0799

DELIVERY OPTIONS: Bulls will be delivered free of charge within 200 km of the farm as soon as possible after the sale at the sellers convenience. Over 200 km will require part way meeting locations or a cost. Bulls can be kept at the sellers farm at no charge until April 1, 2025. A charge of \$6.00 per day will apply after that Heifers should be taken/delivered on or soon after sale day. It is recommended that the 2 year old bulls are taken/delivered in a timely manner, due to the difficulty in managing these mature bulls.

BREEDERS GUARANTEE: Standard terms set forth by the Canadian Simmental Association, with the exception where any animal is subject to any hormonal or surgical reproduction techniques after the sale., the guarantee shall be null and void.

FLECKVIEH STATUS: Full Fleckvieh fullblood will have a minimum of 5 generations or more in their pedigree. It is recommended if further research is required to contact the Canadian Simmental Association and no assumption of fleckvieh heritage will be guaranteed by the consignor or CSA.

SEMENT TESTING: All bulls selling at this sale over the age of 12 months will be semen tested by a certified veterinarian.

FERTILITY AND HEALTH: All bulls and heifers have been under a full herd health program under the guidance of Edson Veterinary Clinic. All bulls have passed a Breeding Soundness Exam prior to the sale.

WEANING DATE: All yearling weaning dates were taken on September 20, 2024 for the bull calves and September 28, 2024 for heifers.

INVOICING: Invoices will be sent to the email address provided. Please advise if not received within 3 days of the sale, please phone Transcon Head Office 403-638-9377

Swantewitt & Sage Simmentals 21st Annual Bull and Heifer Sale

Offering 76 yearlings, 9 two year olds, and 31 registered replacement heifers.

Lunch at 12 PM, sale to follow at 1 PM MST

Welcome to our 21st Annual Bull and Heifer Sale! We've had another great year here on the farm. Cattle prices are at an all-time high and even though feed was a bit tight this summer, we did manage to squeak by with enough. It's a good time to be in the cattle industry. Randy and I also welcomed a baby girl to our mix on October 10, Kahlan Kristine Laird. She is very loved by her two older brothers.

We will once again be working with the Transcon Team for our sale. Please don't hesitate to reach out to one of their sales representatives for any info or questions, or directly to Gerd or I.

Our bull program focuses on the quality and longevity of each individual bull. We do not creepfeed on pasture and allow the bulls to grow at a slower rate to avoid burnout in the future. We really value the number of repeat customers we have and love hearing about the longevity of our bulls. We select our sale bulls and heifers from our herd of 380 registered cows focusing on soundness, temperament, udder structure, and longevity as well as calving ease. Our replacement heifer calves are heifers that represent our herd and breeding program as a whole. We strive to aim for an unassisted calf with good vigor that hops up and nurses quickly and a trouble free cow. Every one of our calves is weighed on a digital scale within 24 hours of birth.

In the past we have always sold two year olds bulls in our sale. However due to the increased costs and management involved with keeping these bulls an extra year, we have made the decision to dissolve our two year old program. This year will be the final year we offer these extended age bulls in the sale. Going forward we will have yearlings only. Our two year olds have always been bulls held after a specific birthdate. They are not the weaker ones by any means but rather just the younger ones.

This year we have a wide selection of Full Fleckvieh bulls available from a few of our tried and true herd sires as well as a few new ones. There are some polled bulls and quite a few calving ease ones too. In our purebred program there are a good variety of homozygous polled red and black sons. We have calving ease sons as well as power and growth bulls. We also have a neat cross between some of our purebred cows with our full fleck bull, Keato Pld Director's Cut as well as his half fleck son, the Jackpot 336J bull. We strive to produce bulls to fit a variety of programs and all are semen tested, guaranteed, and affordable!

Once again our sale will be a live video auction on the farm. The bulls will be available to view on farm at any time and will be in pens for the buyers convenience on Tuesday and Wednesday. Feel free to stop by whenever or check out the bulls online. Snacks and coffee will be provided daily with lunch on sale day. Videos will be posted of each lot on our website at www.swantewittsimmentals.ca and can be found online on Transcon and the DLMS websites.

The cattle are on a complete health program provided by the Edson Veterinary Clinic. All calves receive Nasalgen, an intranasal vaccine, as newborn calves and are then boosted in spring with Pyramid + Prespense and Vision 8 with somnus. They are boosted again in fall with Prespense HM, Express 5, Vision 8 with somnugen, and dewormed with Bovimectin and Clean Up II.

We hope to see you there!

Gerd Bremmekamp, Jordan & Randy Laird | swantewitt@gmail.com

SWANTEWITT MS ROGANT 33X

BLACK GOLD ELEVATION 20E

100% Full Fleckvieh: We seriously considered keeping Mystery for our own herd use. However we do already have 2 Elevation herd sires working so we made the decision to offer him for sale. His dam is an older cow so her calves' birth weights are starting to creep up as we often see in our older cows. She's been a very productive cow for us and we sold Mystery's maternal sister through the Lone Stone sale last fall to Starwest Simmentals for \$14000.00. If you're looking for that dark red pigmentation and good growth and performance, Mystery is the bull. Check out his 2 year old brother and dam picture on Lot 38.

SWANTEWITT POPCORN 72P

VIRGINIA BARCELONA 46X

Full Fleckvieh, Non Dilutor: Mr. Carl packs a punch. He has the size and the muscling of his sire and comes from a moderate framed female. The Blanche cow is 9 years old and calved in mid January this year. She still has a beautiful udder and moves out great. She holds her condition well year after year and is dark brown with goggles. Mr Carl has been one of those calves that catches your eye right from the start.

Full Fleckvieh, Non Dilutor, Scurred: We are very happy with how this young cow is working out for us. This is already her second bull for our sale and he has lots of calving ease in his pedigree. She's a moderate framed lady who, just like her dam, has a great udder. The Alanna 58A cow was one of our favorites and walked our herd until 2 years ago. The Yordan 144Y cow also just left the farm in the past 2 years and we still have many daughters from both of these cows working for us. They have very sound foot structures and nice tempers to deal with.

SWANTEWITT MISS EDDY 69A

HAITI DAUGHTER

Scurred, Full Fleckvieh, Non Dilutor: You know you can never quite guarantee a heifer bull but when it comes to Mischief, he definitely checks all the boxes. This pedigree is stacked with calving ease. Basically every sire in it on the dam's side was a calving ease bull all the way back to MFL Eddy. Mischief doesn't give up muscle either. He's an all around nice bull and should work to bring some birthweights down.

SWANTEWITT FRIDAY 141F

SWANTEWITT DIERDRE 120D

JSJ 35M

Polled, Full Fleckvieh, Non Dilutor: We kept a half interest in the maternal brother to the Kami 131K last year and used him on our heifers with great success. We have found that the Friday 141F cow always throws us a lower birthweighted calf, even as she ages. Our Golf bull has a lot more power and performance and his daughters have very good frame sizes. So overall Magician combines some calving ease with good performance and growth. He should make a very versatile bull. These cows are all dark red, goggle eyed cows with beautiful udders.

Polled, Full Fleckvieh, Non Dilutor: Mike comes from another proven cow in our herd. Glenda is a lady who has also been extremely productive for us and had a bull in our sale last year as well. She's a dark red, goggle eyed cow with lots of muscle from the Apache line. This combination makes a nice package with her muscling and milk and Furtive's growth and calving ease.

MATERNAL BROTHER

Scurred, Full Fleckvieh, Non Dilutor:

Matador really stands out in the bull pen for his cherry red color and size. He's a beautiful bull and has a nice disposition to work with. His dam is colored just like him as is the Dancer 113D cow. The Lot 1 bull is from the Dance cow and you see how this coloring

and growth really pulls through in these genetics. The old B cow was the same. These ladies have been extremely productive for us over the years. They have all held up well with good feet and udders and nice tempers to work with in the barns. Matador brings a lot to the table with his growth and performance.

MATERNAL BROTHER

Polled, Full Fleckvieh: Lebanon comes from an 11 year old cow who is still in our herd to this day. We have sold many bulls out of her and she's also given us some awesome females. She's been a truly remarkable lady for us and has held up very well in both her foot structure and udder confirmation. She puts length and muscle into her calves and is a solid red, goggle eyed female. Lebanon has a very nice temper and moves out well. He's a two year old that can go out and cover some ground.

GOLF DAUGHTER

Homozygous Polled, Full Fleckvieh: It's not often that you see this much muscling in a homo polled bull but Lonestar really packs on the pounds! He's a meatwagon with a nice temper and beautiful pigmentation. We know his birthweight is a bit higher but his dam sustained a severe foot injury while pregnant with him and took months to recover in a small pen which may be a contributing factor to his heavier weight at birth. Overall though Lonestar is the full package and quite a standout bull.

3/4 SISTER

Scurred, Full Fleckvieh: Another bull of mine out of my Doorn cow. This cow also has a Fitzroy yearling in the sale and has given me a bull everytime she calves for the sale. I'd kind of love a heifer one day to replace the girl with as she's getting up there in years. However Doorn is still holding together wonderfully. She has a perfect udder and great, trouble free feet. All of her bull calves have had nice, lower birthweights and she calves back consistently each year. Lux is really just an all around good fellow and brings a lot of consistency to the table.

D: DEEG MS TRU 157H
DEEG MS 125E

Homozygous Polled, Purebred: We purchased Tycoon's dam as a bred heifer from Deeg Simmentals through the Sim Power sale back in the fall of 2021. We were quite excited when she had a bull calf and he turned out so well that we kept him to use as a heifer bull. His first year out he bred about 29 heifers and what a fantastic job he did! Tycoon calves wonderfully and his calves have that nice dark red coloring. We used him again this year and his calves hit the ground running. His dam is an extremely productive female for us and really was a fantastic purchase.

SWANTEWITT CAYENNE 4C

SWANTEWITT GLIMMER 77G

SWANTEWITT BOMBER 22B

SWANTEWITT 90 PROOF 31F

Homozygous Polled Purebred, Non Dilutor: I really love Moody's dam. She has so much depth of rib and thickness. The 90 Proof genetics are pretty well known calving ease lines and when combined with the Cayenne bull we get some growth and thickness. I think Moody is a really nice combination of all the good traits in his pedigree. The Glimmer 77G cow also has a bull in the sale and is another thick, dark red cow.

SWANTEWITT RED NEFF 291Y

SWANTEWITT BARI 17B

SWANTEWITT XARI 180X

SWANTEWITT BARI 17B

Homozygous Polled Purebred, Non Dilutor: Maddox is another calving ease bull. His dam had a 75lb bull calf this year and her genetics have never really pushed birthweight. The cows in her pedigree have all been productive females for us and Maddox is a bit of a smaller frame. He has the look of a heifer bull to him. Jeri 204J comes from cows that are all dark red and built nicely. They have good thickness and nice tempers.

NORTH SKY RED HERC 18M

CMS SCANDAL 963W

CMS SKYLAR 49P

CMS SCANDAL 975G

Homozygous Polled Purebred, Non Dilutor: We purchased Moshi's dam from Czech Mate Simmentals a few years ago. She is a cherry red cow who was the first one to calve for us this year. Moshi takes after his sire with a nice blaze face and good muscle and length. His dam had twins the year before he was born so this likely accounts for the higher birthweight. Her bull calf this year was 92 lbs.

 SWANTEWITT ZUZU 174Z

MATERNAL SISTER

Homozygous Polled Purebred, Non Dilutor: Malik is shaping up to be a gorgeous bull. Check out his dark dark cherry red coloring just like his dam. This cow is young and she's already so productive. Justine and I sold her first daughter through the Lone Stone sale this fall to Four D simmentals. You really have to appreciate how physically correct this cow is. She has a great foot under her and a beautiful udder. The old 15B cow is also still working for us today and holding her own very well at the ripe old age of 11.

Polled Purebred, Non Dilutor: There's a fair amount of calving ease in Marb's pedigree. We used the Skyline bull on young cows because he calved so well. Marb's dam is a nice moderate framed cow with lots of depth of rib and easy fleshing. She's going strong in the herd still and consistently produces a marketable calf for me every year. She's a brown, blaze faced lady with good feet and a beautiful udder. Marb carries that thickness from both his parents as well as the muscling. He's the whole package deal with calving ease and muscle!

MS BGS POLLED PASSION 47Z

Scurred Fullblood, Full Fleckvieh: We did something different during breeding season this year and used a Full Fleckvieh bull on a group of our purebred cows for 10 days of the breeding season. Director's Cut was our heifer bull for our fleckvieh program for many years but became too related to use any longer. However we just love him so much that we decided to try some outcross breeding on our purebred cows and we were really happy with the outcome. He is a really neat combination of calving ease with muscle, growth, and performance. He walked our herd until spring 2023 so these are his final calves on offer. Director's Cut sires thick, stylish calves and his females are often our top selling heifers. We find his son's have phenomenal libido and the daughter's are super maternal with great udders.

MATERNAL BROTHER

SWANTEWITT GETCHA 264G

Polled Purebred: Not tested for dilutor gene. Match really has phenomenal muscling. His dam is a 6 year old cow and this is the 4th bull of hers we have put through our sale. She is a fantastic female as many of our Mountain 64B cows are. She has great muscling through her hindquarters and carries a very good udder with great foot structure. Her bulls are always at the top of the pen for weaning weight and Match is right up there too. I really can't say enough good things about this cow and I'd really love for her to give us a daughter for our program one year!

FULL BROTHER

Scurred Purebred: Not tested for dilutor gene. I sold a full brother to Mission as a two year old with an 84 lb birth weight and a maternal brother as a yearling with a 93 lb birth weight both in last year's sale. This dam has proven she has what it takes to raise a bull and is very consistent. She's a solid, dark brown girl who is very well balanced with a beautiful tight udder and good sound feet. She has a nice, moderate frame size and can really put a lot into her calves. The Major League combination gives Mission some more power and performance in his pedigree.

Montana is a very nicely balanced female. Her dam is solid brown and quite thick with a nice spring of rib. I sold her full brother through the sale last year. Very good feet on these cows.

Terms & Conditions

TERMS - The terms of the sale are cash, cheque, e-transfer, or wire and are due at the time of sale, unless other arrangements have been made between buyer and seller prior to the sale. Transcon reserves the right to charge interest at a rate of 2.5% per month on overdue accounts. The right of property shall not pass until after settlement is made. Transcon Livestock Corp. reserves the right to require a certified cheque as settlement before releasing any sale cattle. Should any purchaser fail to settle for their purchase Transcon Livestock Corp. reserves full power to resell the animal to the best advantage either publicly or privately, without further notice. Any loss arising from such resale together with keep and all other expenses shall be payable by the defaulter. Transcon Livestock Corp and/or the Auctioneer shall have the right to refuse bids from anyone who has a previous record of default in payment or who has not made proper credit clearance prior to the sale with the owner or Sale Managers.

BID - No private sales will be allowed except as otherwise provided for in the terms and conditions. No by-bidding will be permitted.

SALES TAXES - Applicable sales taxes will be charged on semen, embryos, and trucking fees (if listed), respective to the home province of the buyer, not the seller.

DISPUTES - In cases of disputes, bidding will be reopened between the parties involved. If no further bid is made the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision in such matters will be final.

PURCHASER'S RISK - Each animal becomes the risk of the purchaser as soon as sold. Animals will be cared for at the purchaser's risk for a reasonable length of time.

INSURANCE - Each animal becomes the risk of the purchaser at the time of sale and should be insured. Animals returning to the seller's farm must be insured.

US BUYERS - There is an additional charge (approximately \$300.00 US dollars) that will be applied to each animal purchased. This covers documentation, vet inspections/testing required to export. This cost does not include transportation or brokerage which is the responsibility of the buyer.

CATTLE PICTURES AND INFORMATION PROVIDED - The images in this catalogue are believed to be accurate representations of the individual animals and the information contained in this catalogue is provided by the seller and believed to be true and accurate. Transcon Livestock Corp. and catalogue designers/producers assume no responsibility if the images and/or information as received have been altered or is inaccurate.

ANNOUNCEMENTS - All announcements from the auction block will take precedence over the printed matter in the catalogue. Buyers are therefore cautioned to pay attention to any such announcements.

CERTIFICATE OF REGISTRY - A registration/recordation certificate issued by the applicable breed association and duly transferred will be furnished to the buyer of each animal after settlement has been made. It is the responsibility of the buyer to determine the acceptance of this certificate in any other association.

SHIPPING - Assistance will be given in making shipment after the sale but no risk is assumed by the Sales Management or Seller. Expenses incurred are the responsibility of the purchaser. Purchasers are requested to furnish shipping instructions when making settlement.

BREEDERS GUARANTEE - As per applicable Canadian Breed Association Breeding Guarantee guidelines. Copies are available at the sale settlement desk to be picked up by the buyer at any time. In no event shall the seller be responsible for reimbursing more than the purchase price. **EXCEPTION TO GUARANTEE** - In cases where the animal is subjected to any hormonal or surgical reproduction techniques after the sale, the guarantee shall be null and void.

HEALTH - It is the buyer's responsibility to determine health requirements for importing any animal into his province or state. Transcon Livestock Corp. assumes no responsibility for the health status of any animal in the sale.

EMBRYO & SEMEN - Full settlement must be made before release is done and shipping arrangements should be done within 30 days of the sale unless arrangements made between buyer and seller prior to the sale. Shipping arrangements and costs are the expense of the purchaser once release has been given.

ACCIDENTS - Although every precaution will be taken to protect the safety and comfort of buyers, neither the Sales Management, auctioneer, consignors, or Association assumes any responsibility in this matter and disclaims any liability legal or otherwise in the event of accident or loss of property.

RIGHTS AND OBLIGATIONS - The above terms and conditions of the sale shall constitute a contract between the buyer and the seller and be equally binding to both. Resale of animals following purchase in this sale shall constitute a separate transaction and the rights and obligations of the two parties connected thereto are not covered by the terms and conditions of this sale.

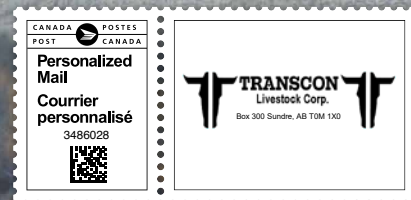

TRANSCON LIVESTOCK CORP. IS AGENT ONLY - It is to be clearly understood that Transcon Livestock Corp. is only acting as a medium between buyer and seller and is not in any way responsible for any failure on the part of either party to live up to his obligations. Neither does Transcon Livestock Corp. assume any financial obligations to collect or enforce collection of any monies between parties. Any legal action that may be taken, in exceptional cases, must be between buyer and seller.

How to find us

Follow the directions above or scan the QR code with your phone to open the map.

The farm is located halfway between Edson and Whitecourt on Highway 32. Turn west off the pavement at the blue Shiningbank Lake Park government sign (TWP 562). Follow this around to the west side of lake, staying to the left when the road splits off to the campground. At the T intersection, turn north on Range Road 145A and then east 1 mile down the road on TWP 564.

Our sign is in the field. Follow it all the way up into the farm.
