

Swantewitt & Sage Simmentals

22ND
ANNUAL

BULL &
HEIFER
SALE

TUESDAY MARCH 10, 2026
LUNCH AT 12PM
SALE TO FOLLOW AT 1PM
AT THE FARM
SHININGBANK LAKE, AB

www.swantewittsimmentals.com

Welcome to the 22nd Annual Swantewitt & Sage Simmentals Bull and Heifer Sale!

Join us on the farm at Shining Bank for a presale lunch and enjoy some great hospitality before sale time.

Last year at this time, cattle prices were already strong -and Wow, they have just continued to creep up. We have truly hit a profitable and exciting time in the cattle industry, with the future looking bright! I truly hope all producers are proud of themselves for hanging on through some very tough years to get to this point, the hard work and perseverance has paid off!

I viewed the bulls in late December and was genuinely impressed. It felt like more bulls jumped out at me than ever before, a great sign the quality is up again this year. This is a large group of Hairy/Stout bulls that are developed in a sensible, moderate manner to ensure longevity and durability for their customers. You can be confident that every step has been taken to present a sound, functional set of bulls built for real-world conditions.

With large sire groups represented, buyers will have the opportunity to sort through numerous half-brothers, allowing for excellent consistency across your bull battery. Whether you are searching for Reds/Blacks or Flecks, there is an abundance of options in the Swantewitt/Sage bull pen.

Twenty eight replacement heifers will also be on offer and should be highly sought after in today's market. These females are ready to go to work, hitting your breeding pens to help build maternal strength and longevity to move your cowherd to the next level.

If you are unable to attend the sale in person, please reach out to any of the Transcon Team for assistance.

Hope to see you sale day.

Regards,

Glenn Norton

Transcon Livestock Corp.

Auctioneer: Robert Lind

Ringmen: Darren Paget and Don Oberg

Sales Day Phones:

Jay Good	403-556-5563
Glenn Norton	780-542-0634
Darren Paget	403-323-3985

Gerd Bremmekamp	780-712-2096
Jordan Laird	780-712-3600
Tony Wolfe	780-524-9322

DELIVERY OPTIONS: Within 200 km of the farm as soon as possible after the sale at the sellers convenience. Over 200 km we will do our best to deliver at a central meeting place or part way. Transportation costs may apply depending on the location of the buyer. Bulls can be kept at the sellers farm at no charge until April 1, 2025. A charge of \$6.00 per day may apply after that. Heifers should be taken/delivered on or soon after sale day.

BREEDERS GUARANTEE: Standard terms set forth by the Canadian Simmental Association, with the exception where any animal is subject to any hormonal or surgical reproduction techniques after the sale., The guarantee shall be null and void.

FLECKVIEH STATUS: Full Fleckvieh fullblood will have a minimum of 5 generations or more in their pedigree. It is recommended if further research is required to contact the Canadian Simmental Association and no assumption of fleckvieh heritage will be guaranteed by the consignor or CSA.

FERTILITY AND HEALTH: All bulls and heifers are on a complete health program provided by the Edson Veterinary Clinic. Nasalgen intranasal vaccine is given at birth and then boosted in spring with Pyramid + Presponse and Vision 8 with somnus. Calves are boosted again in fall with Presponse HM, Express 5, Vision 8 with somnugen, and dewormed with Bovimectin and Clean Up II. All bulls will be semen tested by a certified veterinarian.

WEANING DATE: Bulls were taken on September 10, 2025 and heifer calves were taken on October 7, 2025.

INVOICING: Invoices will be sent to the email address provided. Please advise if not received within 3 days of the sale, please phone Transcon Head Office 403-638-9377

Swantewitt & Sage Simmentals 22nd Annual Bull and Heifer Sale

Offering 81 yearlings, 2 two year olds, and 28 registered replacement heifers.

Lunch at 12 PM, sale to follow at 1 PM MST

Welcome to our 22nd annual bull and heifer sale! Thank you so much for taking the time to look through our catalog at this year's offerings and thank you to all the past buyers who have supported our program throughout the years. Another year has come and gone in this very promising industry and the kids are all growing up along with the calves.

As you look through our catalog you may notice that our program is built on a lot of our own genetics. Many of our bull and heifer calves go back 5+ generations of our own breeding on the cow side. We have focused our herd on using a combination of our own homegrown bulls with industry proven sires and found that is what works best for us. Our goal over the years has been to produce good quality cattle and to focus on foot and udder structure. We've strived for an affordable yet highly functional set of bull calves to offer as well as a good handful of replacement females that represent our current sire groups.

We calve 385 head of registered Purebred and Full Fleckvieh cows. The bull pen starts with approximately 160 bulls in it when we wean and ends with the ones cataloged. Over half are cut. Bulls are picked based on their calving ease, weaning weights, temperaments, dams, and scrotal measurements. There are many that are good, but to make the cut, they must be great. We put emphasis on unassisted calvings, trouble free dams with good udders, structural soundness, and a manageable disposition.

In both our fullblood and purebred bull offering there are some polled scurred bulls. Jerry Repka said it so well in his catalog introduction that I asked to use it here too. The scurred gene does not affect whether an animal is horned or polled, it only affects the presence of scurs in animals that are genetically polled. Meaning a scurred bull is not more likely to throw horns than a smooth polled bull. We have dilution tested all of the bulls. If there are any questions regarding this, please don't hesitate to call.

Our sale will be a **live video auction on the farm**. The bulls will be available to view on farm at any time and will be in pens for the buyers convenience on Monday and sale day. Feel free to stop by anytime or check out the bulls online. Videos will be posted of each lot on our website at www.swantewittsimmentals.com and can be found online on Transcon and the DLMS websites.

We hope to see you there!

Jordan & Gerd | swantewitt@gmail.com | www.swantewittsimmentals.com

Directions to the farm are on the back page. Please look for this sign when coming.

SWANTEWITT DIERDRA 120D

Fullblood, Full Fleckvieh: We kept a half interest in Lunar since he had such calving ease potential and he has not disappointed. Both us and his other owners have been using him on heifers with great success. He calved so well in 2025 that we actually bred most of our fullblood heifers to him this year and have a ton of calves on the ground. They are spry with lots of vigor and still nice growth. He is extremely consistent coming from a cow family with perfect udders and very good temperaments.

SWANTEWITT BEST 47B

WOLFE FITZROY FF 72F

1

Full Fleckvieh, Non Dilutor: Nexus is a heck of a bull coming off a first calf heifer with a low birth weight and high weaning weight. The cow family is still in production up to and including the Best 47B cow. These females have great milk and are thick, deep girls that have performed well for us throughout the years. Lory bred back and has calved in early January again this year with a very nice, 74 lb heifer calf. Our Fitzroy daughters are great mothers and we absolutely love them in our herd.

 SWANTEWITT TANGERINE 121T

2

Full fleckvieh, Scurred, Dilutor Carrier: Here's a bull with a nice moderate frame size who is smooth built. He has a really solid cow family supporting him on the maternal side. The Driva 126D cow is still working down at Darian's place and even at her older age, still has great feet and a very clean udder. Good fertility runs in this cow line. Navish has small scurs and will take horns off calves.

 SWANTEWITT GOLD 81G
 SWANTEWITT CARAT 182C

3

Full Fleckvieh, Non Dilutor: Nimble is a sweetheart of a bull. During the picturing he laid right down in the pen and just hung out. He's great to work with and has lots of muscle and growth. The cows in his cow family are all lovely, moderate framed females with beautiful, tight udders and very good production. The Carat 182C cow was highly productive for us and is still working up north for MT Ranch in their herd. Gold 81G has her own bull calf in the sale, lot 25, with one of the highest weaning weights. These cows are all great to have in the herd.

BLACK GOLD MS FLORA 84B SWANTEWITT CONNIE 232C

Fullblood, Full Fleckvieh, Non Dilutor: Luxury is another homegrown bull who is turning into an exceptional herd sire. He's dark red with goggles just like his dam. The feet in this cow family are awesome and the udders are impeccable. His great grandam, JSJ 207M, produced for us until she was 15 years old! Both dam and grand dam are still going strong in the herd and often wean off in the top 10% come fall. The first calf crop has yielded some gorgeous, thick haircoated heifer calves also with his same coloring and the bull calves are very similar as well. We did use him again with more calves coming this year.

SWANTEWITT 39K

Fullblood, 15/16 Fleckvieh, Non Dilutor: We've started a small fall program in replacement of our two year old program in hopes these guys fight less! Mortimer is the first fall bull being offered in the sale. His dam is a 10 year old cow who has always been one of our favorites. She's a deep, thick lady with a nice temperament and has been a very productive cow over her lifespan. Mortimer has that extra growth for peace of mind in the breeding season. He was still put across our digital scale at birth for an accurate birth weight.

SWANTEWITT MISS 89A
SWANTEWITT REV 198 R

Full Fleckvieh, Non Dilutor: Marv is an all around very nice tempered bull and the only two year old we have on offer this year. We didn't have a buyer for him last year but he was just too nice of a boy to let go so we kept him to sell as a two year old. This guy would be great for community pasture or anyone looking for a bull to go out and breed immediately. He has that extra age and growth to really get the job done. His dam is dark cherry red with full goggles and a gorgeous udder. She goes back to the Aero bull and has always been a very reliable lady for us.

NAC TRUSTIN 85ASWANTEWITT DAHLIA 41D
SWANTEWITT SUNFLOWER 27S

Homozygous Polled Purebred, Non Dilutor: Nial also is a bull I would look at for calving ease. I remember the night he was born. His dam had him totally unassisted during a cold snap and I couldn't get out there fast enough to get her into a barn before he was born. He has lots of our older genetics on the dams side and great udders on these cows.

KEATO BROOK 8B

SWANTEWITT BAJA 35B

Homozygous Polled, Purebred: Jackpot is a really neat combination of a purebred dam and a full fleckvieh sire. This bull is one of our favorites on the farm due to his true hybrid vigor. You really can't find much better than him. He crossed the scale at 2850 lbs this fall coming off grass and has the versatility to breed any age group from heifers to cows. We are calving his daughters for the first time this year and they calve great with wonderful maternal instincts. We also kept a son last year to use on young cows and he is also dropping very reasonably weighted calves with no trouble.

TWIN-CHIEF WYOMING 28W
SWANTEWITT YEVITA 12Y
SWANTEWITT NIAGRA 64N

Heterozygous Polled Purebred, Non Dilutor: This is our third year of Rattler son's. We have really enjoyed calving him as he calves great, the calves have lots of vigor and wean off with good muscle. They have good eye appeal and thickness, Nifty holds true for this with his dark red coloring and deep bodied appearance. His dam is a big Everest cow and we think this is a great combo for performance and growth but also some frame moderation.

SWANTEWITT CARLY 3C

SWANTEWITT APRIL 153A

Homozygous Polled Purebred, Non Dilutor: Navy is another typical Rattler son. Born unassisted from a powerful cow, her heifer calf was 102 lbs this year. The Glow 58G cow has provided us with a few bulls for our sales over the years and she's a lady with a nice frame size. Another of our typical Cayenne daughters. Combining her with Rattler is the best of both worlds.

 SWANTEWITT PRETZEL 29P

SAGE 722N

I really love this heifer and was quite hesitant to part with her. She has such fun, beautiful coloring and is a total sweetheart to be around. This cow family has helped build my herd and they are very reliable with great feet and very good udders. All around good tempers and trouble free ladies.

I've kept her twin sister for my own herd. Nola's dam is a big powerful black cow who weaned off a 900 lb bull calf last year as a first time heifer. I have high hopes for her. She bred back with no trouble after having twins.

Nasturtium is from one of our older, very well proven cows. She's the maternal sister to our Brave herd bull and is 10 years old but still working in our herd. She calves in January each year, perfect udder and great feet under her. All around very good cow.

Terms & Conditions

TERMS - The terms of the sale are cash, cheque, e-transfer, or wire and are due at the time of sale, unless other arrangements have been made between buyer and seller prior to the sale. Transcon reserves the right to charge interest at a rate of 2.5% per month on overdue accounts. The right of property shall not pass until after settlement is made. Transcon Livestock Corp. reserves the right to require a certified cheque as settlement before releasing any sale cattle. Should any purchaser fail to settle for their purchase Transcon Livestock Corp. reserves full power to resell the animal to the best advantage either publicly or privately, without further notice. Any loss arising from such resale together with keep and all other expenses shall be payable by the defaulter. Transcon Livestock Corp and/or the Auctioneer shall have the right to refuse bids from anyone who has a previous record of default in payment or who has not made proper credit clearance prior to the sale with the owner or Sale Managers.

BID - No private sales will be allowed except as otherwise provided for in the terms and conditions. No by-bidding will be permitted.

SALES TAXES - Applicable sales taxes will be charged on semen, embryos, and trucking fees (if listed), respective to the home province of the buyer, not the seller.

DISPUTES - In cases of disputes, bidding will be reopened between the parties involved. If no further bid is made the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision in such matters will be final.

PURCHASER'S RISK - Each animal becomes the risk of the purchaser as soon as sold. Animals will be cared for at the purchaser's risk for a reasonable length of time.

INSURANCE - Each animal becomes the risk of the purchaser at the time of sale and should be insured. Animals returning to the seller's farm must be insured.

US BUYERS - There is an additional charge (approximately \$300.00 US dollars) that will be applied to each animal purchased. This covers documentation, vet inspections/testing required to export. This cost does not include transportation or brokerage which is the responsibility of the buyer.

CATTLE PICTURES AND INFORMATION PROVIDED - The images in this catalogue are believed to be accurate representations of the individual animals and the information contained in this catalogue is provided by the seller and believed to be true and accurate. Transcon Livestock Corp. and catalogue designers/producers assume no responsibility if the images and/or information as received have been altered or is inaccurate.

ANNOUNCEMENTS - All announcements from the auction block will take precedence over the printed matter in the catalogue. Buyers are therefore cautioned to pay attention to any such announcements.

CERTIFICATE OF REGISTRY - A registration/recordation certificate issued by the applicable breed association and duly transferred will be furnished to the buyer of each animal after settlement has been made. It is the responsibility of the buyer to determine the acceptance of this certificate in any other association.

SHIPPING - Assistance will be given in making shipment after the sale but no risk is assumed by the Sales Management or Seller. Expenses incurred are the responsibility of the purchaser. Purchasers are requested to furnish shipping instructions when making settlement.

BREEDERS GUARANTEE - As per applicable Canadian Breed Association Breeding Guarantee guidelines. Copies are available at the sale settlement desk to be picked up by the buyer at any time. In no event shall the seller be responsible for reimbursing more than the purchase price. **EXCEPTION TO GUARANTEE** - In cases where the animal is subjected to any hormonal or surgical reproduction techniques after the sale, the guarantee shall be null and void.

HEALTH - It is the buyer's responsibility to determine health requirements for importing any animal into his province or state. Transcon Livestock Corp. assumes no responsibility for the health status of any animal in the sale.

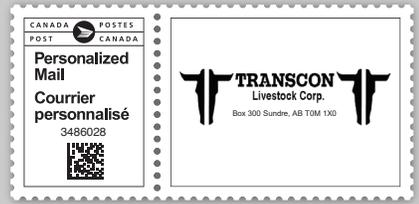

EMBRYO & SEMEN - Full settlement must be made before release is done and shipping arrangements should be done within 30 days of the sale unless arrangements made between buyer and seller prior to the sale. Shipping arrangements and costs are the expense of the purchaser once release has been given.

ACCIDENTS - Although every precaution will be taken to protect the safety and comfort of buyers, neither the Sales Management, auctioneer, consignors, or Association assumes any responsibility in this matter and disclaims any liability legal or otherwise in the event of accident or loss of property.

RIGHTS AND OBLIGATIONS - The above terms and conditions of the sale shall constitute a contract between the buyer and the seller and be equally binding to both. Resale of animals following purchase in this sale shall constitute a separate transaction and the rights and obligations of the two parties connected thereto are not covered by the terms and conditions of this sale.

TRANSCON LIVESTOCK CORP. IS AGENT ONLY - It is to be clearly understood that Transcon Livestock Corp. is only acting as a medium between buyer and seller and is not in any way responsible for any failure on the part of either party to live up to his obligations. Neither does Transcon Livestock Corp. assume any financial obligations to collect or enforce collection of any monies between parties. Any legal action that may be taken, in exceptional cases, must be between buyer and seller.

How to find us

Follow the directions on the map or scan the QR code with your phone to open the map.

The farm is located halfway between Edson and Whitecourt on Highway 32. Turn west off the pavement at the blue Shiningbank Lake Park government sign (TWP 562). Follow this around to the west side of lake, staying to the left when the road splits off to the campground. At the T intersection, turn north on Range Road 145A and then east 1 mile down the road on TWP 564.

Our sign is in the field. Follow it all the way up into the farm.
